DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figure 42 should apparently be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The abstract of the disclosure is objected to because of the following reasons: (A) The reference numerals are not presently enclosed within parentheses. (B) The word "obtaining" (line 8) should apparently be changed to --obtain--. Correction is required. See MPEP § 608.01(b).

Art Unit: 1724

4. The disclosure is objected to because of the following informalities: (A) The expression "Fig. 42 and" (page 1, line 12) should apparently be changed to --Fig. 42--. (B) It would appear that an expression such as --in a conventional carburetor-- should be inserted between "valve" and the period (page 13, line 21). Appropriate correction is required.

Election/Restrictions

5. This application contains claims directed to the following patentably distinct species of the claimed invention: (A) Figures 1-11; (B) Figures 12, 13; (C) Figures 14-16; (D) Figures 17-27; (E) Figures 28, 29; (F) Figures 30-39, and (G) Figures 40 and 41.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1724

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

6. Action on the merits of the claims is held in abeyance pending applicant's response. However, it is noted that the word "pip" (claim 1, line 2) should apparently be changed to --pipe-
